**CENTER FOR BIODIVERSITY
 MOVEMENT AND GLOBAL CHANGE**

Linking Individual Behavior to Community Responses in Changing Landscapes

Monday, May 13
9:00 am – 5:00 pm
Burke Auditorium, Kroon Hall
 195 Prospect St., New Haven, Connecticut

Animal movement research has provided important insights about the use of space and resources by species in changing environments. New tracking and remote sensing technologies now begin to enable a multi-species and even whole community perspective. This Symposium will feature new research and ideas for connecting distributions, interactions, and niches across levels of ecological organization and for linking behavioral with ecological processes.

| <p>8:45 am WELCOME RECEPTION (COFFEE) :</p> <p>9:00 am Tracking Biodiversity Movement:
 Walter Jetz (Yale, MPYC)
 Martin Wikelski (MPIO, MPYC)</p> <p>9:45 am Multi-Species Movement Ecology:
 Meg Crofoot (UC Davis)
 Roland Kays (North Carolina State)
 Katherine Mertes (Smithsonian)</p> <p>10:45 am COFFEE BREAK</p> <p>11:00 am Integrating Multi-Individual Behavior:
 Dan Rubenstein (Princeton)
 Blair Costelloe (MPIO)
 Damien Farine (MPIO)</p> <p>12:15 pm LUNCH BREAK</p> | <p>1:15 pm From Individual Movement to Species Ecology:
 Dustin Rubenstein (Columbia)
 Raul Costa-Pereira (McMaster)
 Brett Jesmer (Yale, MPYC)
 Remington Moll (Michigan State)</p> <p>2:30 pm COFFEE BREAK</p> <p>3:00 pm Movement Informed by Remote Sensing:
 Doris Klein (Earth Observation Center)
 Ryan Pavlick (NASA)</p> <p>3:45 pm Movement Ecology, Conservation, and Global Change:
 Mathew Mutinda (Kenya Wildlife Service)
 Jared Stabach (Smithsonian)
 Vanessa Ezenwa (Georgia)
 Tyler Kartzinel (Brown)</p> <p>5:00 pm DRINKS RECEPTION</p> |
